Education

New York University Shanghai, Shanghai, China

May '27

Major: Business and Finance & Data Science

- Cumulative GPA: 3.918

ACADEMIC ENRICHMENT

Participant, NYUSH Business and Economics Honors Program

Sep '26

- Selected for the program as a **top 10% student university-wide** (GPA 3.83/4.0), reflecting sustained academic excellence across the business and economics curriculum.
- Conducted a **year-long independent research project** under the guidance of Professor Zhou Xin, Executive Director of the Volatility Institute at NYUSH, developing a quantitative research on **news sentiment analysis**.

Summer Research Participant, NeoSchool Research Program

Jul '26 - Aug '26

- Guided by **Professor Gunther Roland** from MIT and TA Alex Cai, studied ML topics including **GRUs and autoencoders** alongside agentic benchmark evaluation methodology and basic physics concepts.
- Built a **four-stage benchmark pipeline** — task design, data/prompt preparation, headless execution, and scoring — to evaluate five command-line AI coding agents on physics tasks.
- Ran **51 headless trials** across a damped harmonic oscillator and a particle-identification task, combining deterministic and LLM-judge scoring to separate agents fourfold on a discriminating estimation axis.

Participant, CGMA A Star Scholarship Program

Jul '25 - Aug '25

- Selected as **one of 23 top students nationwide** for a **7-day AICPA & CIMA scholarship program**.
- Completed CIMA-led training and **passed the CGMA Strategic Level exam**, earning **CGMA affiliate status**.

Learning Assistant, NYU Shanghai Academic Resource Center

Feb '25 - May '25

- Tutored students about the course **Principles of Financial Accounting** which I got an **A** previously.
- Held **office hours** and **review sessions** for approximately 100 students, totaling **20 hours of tutoring support**.

Participant, NYU Shanghai First-Year Fellowship Circle

Mar '24 - May '24

- Selected as one of **15 students from 500 freshmen** and the only finance major student to join the program.
- Developed an **investment portfolio proposal** using two years of historical CSI 300 Index data.

PROFESSIONAL EXPERIENCE

Summer Intern, Fullgoal Fund Management Co., Ltd.

Jun '26 - Aug '26

- Replicated the code implementation of **2 quantitative research reports** — a QRF-based ETF rotation strategy and a deep learning model enhancement incorporating long-short signals with market regime indicators.
- Contributed to the design and development of **an agentic AI framework** orchestrating **4 collaborative AI agents**, successfully applying it to replicate the **2 aforementioned quantitative research reports**.
- Completed **20+ training sessions** on **investment research frameworks** and **AI-related methodologies**, building foundational knowledge across quantitative research and applied AI.

Summer Intern, CCB Principal Asset Management Co., Ltd.

Jun '25 - Jul '25

- Participated in **five sell-side market roadshows** across diverse sectors such as 3D printing and industrial components, developing a systematic understanding of equity research and market analysis methodologies.

- Completed an intensive **5-day, 30-session sector research training program** hosted by Industrial Securities, building **cross-sector research frameworks** spanning pharmaceuticals, overseas TMT, and other industries.

Summer Intern, Western Securities Co., Ltd.

Jun '24 - Aug '24

- Systematically studied China's **securities market structure and trading mechanisms**, and participated in **front-office trade entry** and **information processing** for fixed income transactions.
- Compiled and produced the firm's counterparty **credit risk assessment reports**, and maintained accurate entry of rating results into the firm's internal counterparty rating database.

COURSE PROJECT

PivotPoint AI: Office-to-Resi Conversion Feasibility Scoring

Apr '26 - May '26

FINC-GB 2328 Data Science and AI in Real Estate

NYU Stern

- Built a **14-subscore deterministic feasibility model** over NYC PLUTO zoning, landmark, and transit data to score office-to-residential conversions on a 0–100 scale, paired with a **Gemini 2.5 Pro** vision pipeline that extracts floor-plan features like window-to-wall ratio and floor-plate depth without influencing the score.
- Deployed a **pgvector RAG pipeline** over NYC building code to surface citations against detected violations, and shipped a **React/Vite** front end that overlays results on floor plans and exports deal memos for analysts.

NYC Shield: Illegal Housing Detector

Mar '26 - May '26

TECH-UB 57 Data Science and AI for Business

NYU Stern

- Engineered a **20-feature compliance model** from 36,111 Airbnb listings, constructing a rule-based **is_illegal** label under NYC Local Law 18, then benchmarked **six classifiers** and voting ensembles to select a **Random Forest** reaching 0.989 test AUC, explained via **SHAP**.
- Built a **Monte Carlo simulation** and profit-curve analysis to convert model scores into audit ROI, showing model-driven targeting nets **\$1.77M** on a 1,000-audit budget versus a \$72.5K loss under random auditing at an 82.8% hit rate; shipped as a **Streamlit dashboard** for OSE deployment.

ReadRadar: ML-Powered Book Discovery App

Mar '26 - May '26

CSCI-UA 473 Fundamentals of Machine Learning

NYU

- Built a **semantic search and recommendation engine** for a 5,000-book catalog, implementing retrieval, a recency-weighted persona-vector recommender, and **spherical k-means++ clustering** directly in NumPy.
- Designed a **review analysis pipeline** powered by Claude that reads twelve rating-balanced reviews per book to generate grounded controversy tags and reader verdicts, deployed via Streamlit.

KEY SKILLS

- Computer Skills: Python, SQL, Minitab, R, Excel, Powerpoint, Word, Adobe Photoshop
- Languages: Fluency in English and Chinese
